DATA PREPARATION PHASE

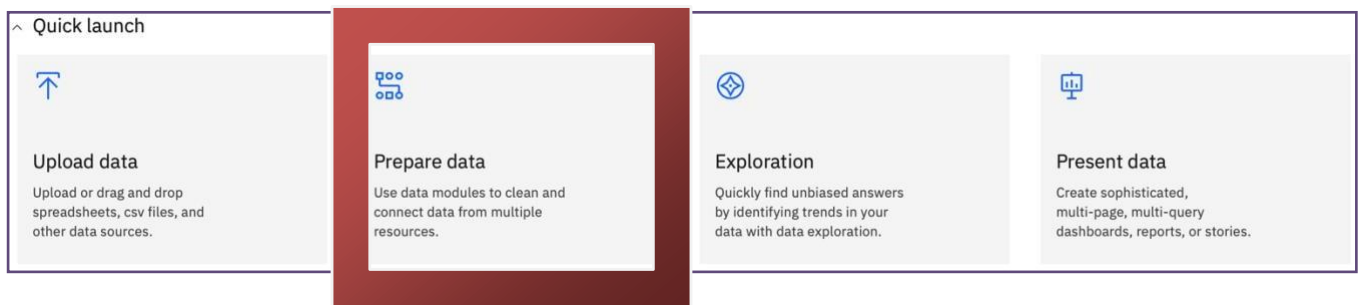

1. Open IBM Cognos Dashboard

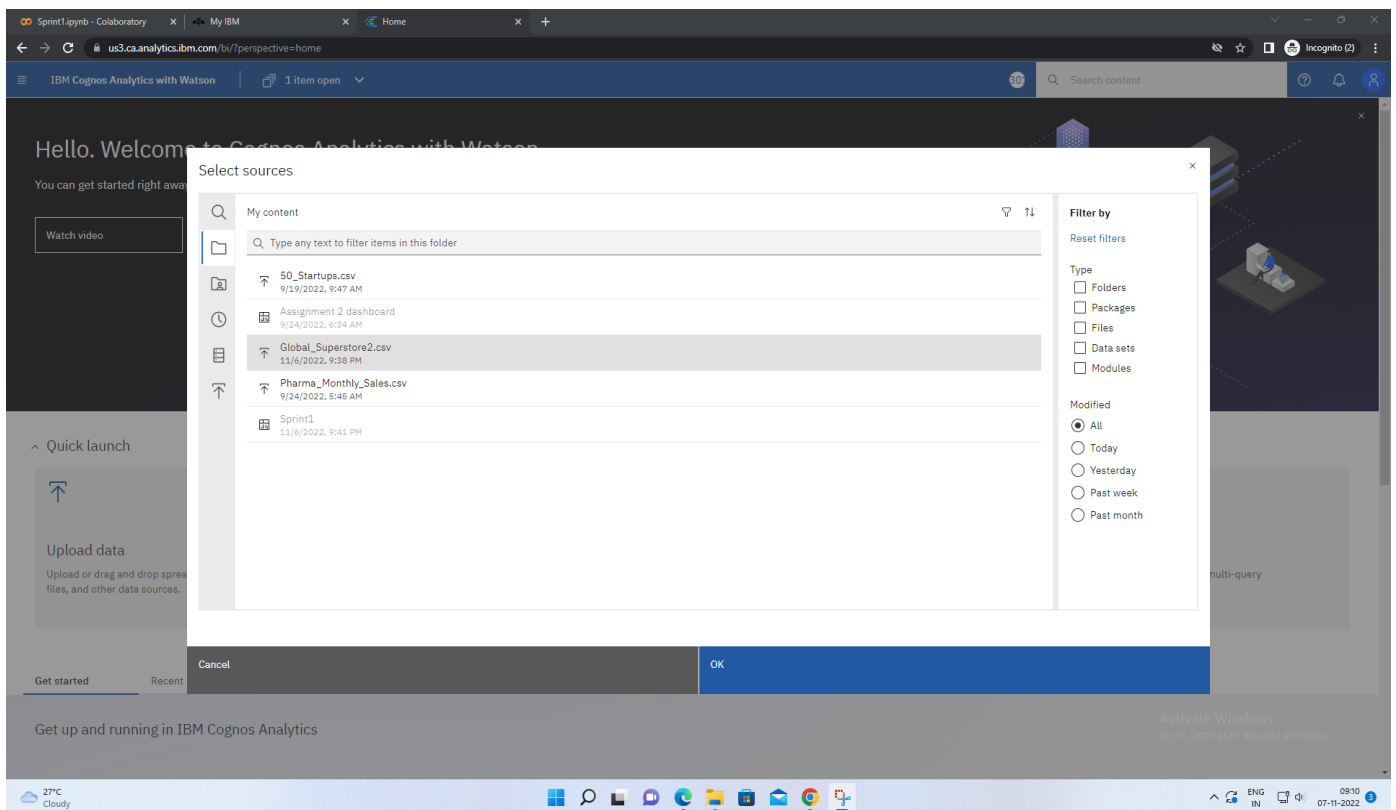

Preparation phase:

We must prepare the dataset after it has been uploaded to the IBM Cognos dashboard. The process of preparing data involves cleaning it up, eliminating duplicate and null values, and organising it in a way that makes it easy to explore and analyse.

2. Click on the Prepare Data option

3. Now select the uploaded dataset from the menu

Select the dataset to be cleaned and prepared now.

4. Exploring the Data modules

The screenshot shows the IBM Cognos Analytics interface. The left sidebar contains a 'Data module' section with a search bar and a list of navigation paths. The main area displays a 'Preview data' message with a calendar icon and the text: 'To preview data, select a table, a column in a table, or a folder that contains columns.'

Activate Windows
Go to Settings to activate Windows.

5. Understanding the Data

The screenshot shows the IBM Cognos Analytics interface with a data table. The table has columns: Row ID, Order ID, Order Date, Ship Date, Ship Mode, Customer ID, Customer Name, and Segment. The data is as follows:

6. Filtering the data

Sort the data to meet your needs and eliminate any extraneous information.

The screenshot shows the IBM Cognos Analytics interface. On the left, the 'Data module' sidebar lists various fields like Order ID, Ship Date, Customer ID, etc. The main area displays a table with columns: category, Sub-Category, Product Name, Quantity, Discount, Profit, Shipping Cost, and Order Priority. A context menu is open over the 'Product Name' column, showing options like 'Filter...', 'Create data group...', 'Create navigation path...', 'Split...', 'Hide from users', 'Remove', 'Format data...', 'Clean...', 'Sort descending', 'Sort ascending', and 'Properties'.

7. Creating Relationships among the data

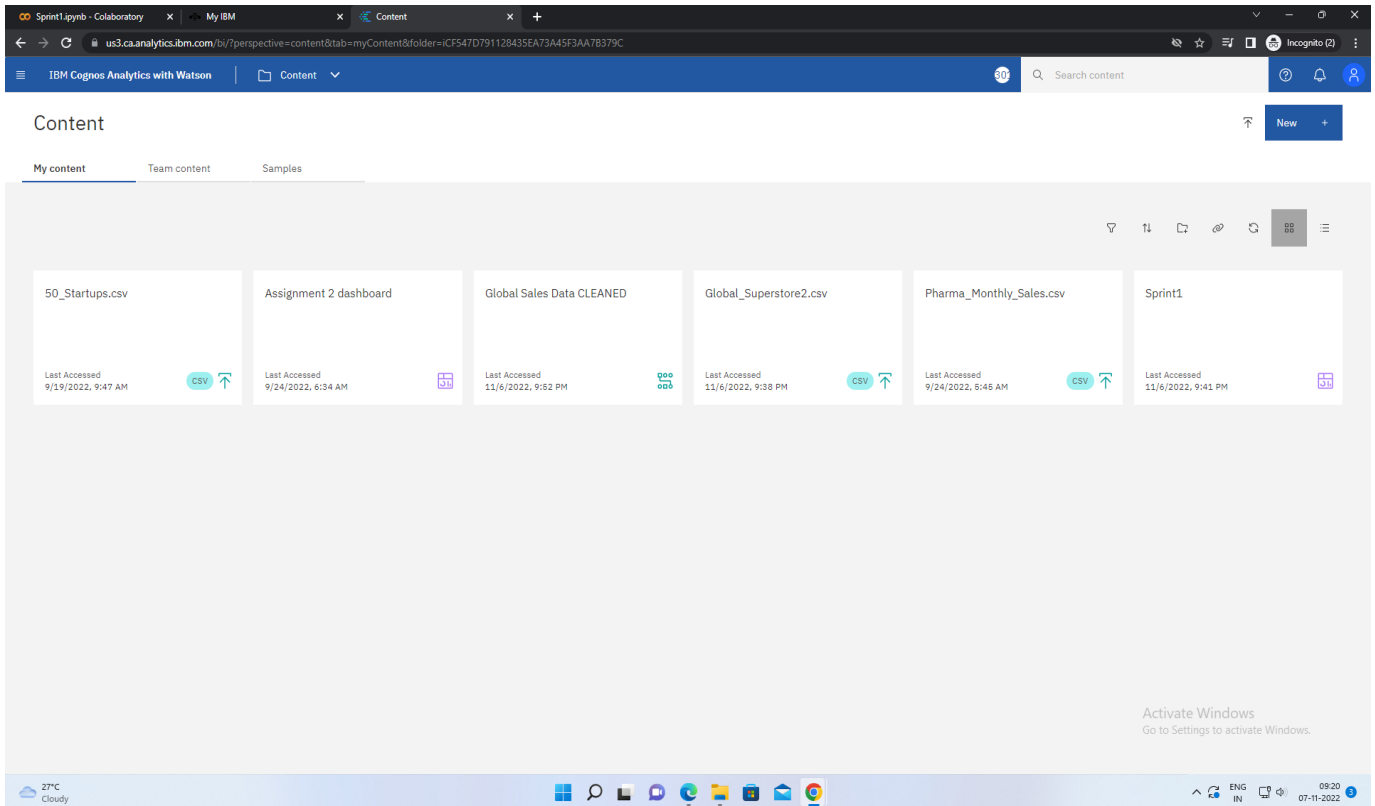

8. Save the dataset after preparing the data

9. Open “Content” from the menu bar

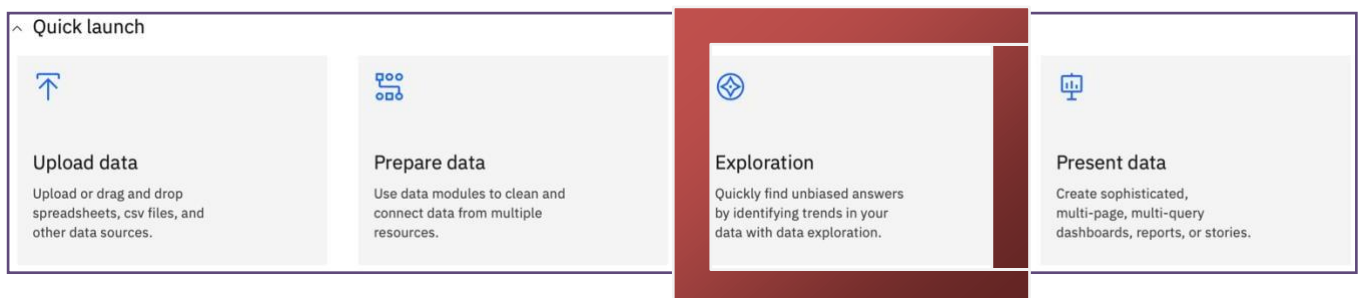

You can access the uploaded and stored data here.

DATA EXPLORATION PHASE

10. Data Exploration

To analyze the information, select the Exploration option.

11. Select the Data to be explored

To begin browsing the cleaned and prepared data, choose "My Content" from the menu.

The screenshot shows the IBM Cognos Analytics web application. A modal dialog titled "Add a data source to explore" is open, displaying a table of available data sources under the "My content" tab. The table lists several CSV files and a data module, all of which have been cleaned.

Name	Type	Last Accessed
50_Startups.csv	Uploaded file	9/19/2022, 9:47 AM
Global Sales Data CLEANED	Data module	11/6/2022, 9:52 PM
Global_Superstore2.csv	Uploaded file	11/6/2022, 9:38 PM
Pharma_Monthly_Sales.csv	Uploaded file	9/24/2022, 5:45 AM

The background interface includes a sidebar with "Quick launch" options like "Upload data", "Get started", and "Recent". The main area shows a "Present data" section with instructions on creating sophisticated dashboards.

12. Start exploring the data and create relationships among the data.

The screenshot displays the "Explore data relationships" view in IBM Cognos Analytics. A relationship diagram is shown for the "Global Sales Data CLEANED" dataset, with "Quantity" as the central node. It is connected to several other nodes: "Discount", "Region", "Market", "Profit", "Sales", "Country", and "Shipping Cost". The diagram is interactive, with a "Reset to original" button and an "Edit diagram" dropdown. A zoom slider at the bottom indicates the current view is at 100%.

On the right side, a "Select a visualization" panel offers options to explore visualizations related to "Profit", including a large "1.47M Profit" card and a "Profit and Sales for Country regions" card. The interface also includes a sidebar with "Cards" and a top navigation bar with "New exploration" and "Search content" options.
